INTRODUCTION TO THE ODYSSEY

- The Odyssey is an ancient Greek epic traditionally attributely to Homer.
- It narrates the long and difficult journey of Odysseus, king of Ithaca, on his return home after the Trojan War.
- The journey takes ten years after the war.
- The poem also follows events in Ithaca, where his wife Penelope and son Telemachus face the suitors who occupy his house and seek Penelope's hand.
- The central idea is homecoming, or nostos.
- The epic explores courage, intelligence, loyalty, hospitality, temptation, justice and the relationship between mortals and gods.
- Odysseus succeeds not only through physical strength but also through patience, cleverness and self-control.
- The story combines adventure, family conflict, divine intervention and restoration of order.

ABOUT HOMER – LIFE AND LITERARY BACKGROUND

- Homer is traditionally regarded as the earliest and greatest poet of ancient Greek literature.
- His exact identity, birthplace and dates are uncertain.
- Ancient tradition associates him with the Greek coast of Asia Minor and sometimes describes him as blind; several cities claimed to be his birthplace.
- Historians commonly place him around the 8th century BCE, though dates remain debated.
- He is traditionally credited with the Iliad and the Odyssey, two foundational works of Western literature.
- These poems grew out of a long oral tradition of bardic poetry.
- Homeric singers performed for listeners, using inherited stories, formulaic expressions, repeated phrases and epithets.
- The poems were composed in the aftermath of a heroic age remembered through stories of war and conquest.
- Homer's works shaped Greek education, culture and later Western literary imagination.

HOMER AND THE GREEK EPIC TRADITION

- Greek epic poetry grew from oral storytelling and the heroic traditions of ancient Greece.
- Bards recited long narrative poems before audiences, preserving stories of heroes, wars, journeys and divine involvement.
- The Iliad and the Odyssey are the earliest surviving major examples of this tradition.
- The Iliad centres on the heroic strength, anger and warfare associated with the Trojan War, while the Odyssey emphasizes the cunning, endurance and wit required for the journey home.
- Homer inherited stories, language, metre and poetic techniques from earlier generations of oral poets.
- Repeated epithets and formulaic phrases helped the bardic style and gave the poetry a distinctive rhyttm.
- Greek epic celebrates heroic action but also presents human relationships, hospitality, feasting, wealth, courtesy, seafaring and pastoral life.
- The Odyssey combines the ancient theme of retribution with a complex narrative and highlights the value of intelligence alongside strength.

HISTORICAL BACKGROUND – TROJAN WAR

- The Trojan War forms the legendary background to The Odyssey; Odysseus fought at Troy before beginning his journey home.
- Archaeological investigations place the siege and destruction of Troy in the 12th century BCE.
- The war was fought between the Achaeans (Greeks) and the people of Troy.
- The conflict is associated with Helen, whose recovery is mentioned after the fall of Troy.
- Odysseus, king of Ithaca, joined the Achaean forces with other Greek leaders.
- Menelaus, Nestor and Agamemnon are named among the Greek heroes who succeeded in returning home.
- Achilles is remembered as a great hero of the Trojan War.
- Troy was ultimately sacked after a ten-year war; the surviving Greek warriors then began their homeward journeys.
- The epic recalls the heroic age through stories of war, courage, conquest and the fate of its warriors.

STORYLINE AND BACKGROUND OF THE ODYSSEY

- Odysseus, king of Ithaca, husband of Penelope and father of Telemachus, leaves home to fight at Troy.
- After the ten-year Trojan War and the fall of Troy, the Greek survivors set sail for home.
- Some leaders, including Menelaus, Nestor and Agamemnon, reach home; Odysseus faces further trials.
- His homeward journey takes another ten years. He is detained on the island of Ogygia by the nymph Calypso.
- His family and people in Ithaca fear that he is dead.
- Suitors gather in his palace, seek Penelope's hand and consume his wealth.
- Penelope delays remarriage by weaving a shroud by day and secretly unravelling it at night.
- Telemachus, now grown, struggles to protect his father's house and seeks news of him.
- Homer begins the poem in the middle of events, with Odysseus still away from home.
- In Books IX–XII, Odysseus narrates his adventures and hardships before the Phaeacians, King Alcinous and Queen Arete.
- The central movement of the epic is the long-awaited homecoming and restoration of order in Ithaca.

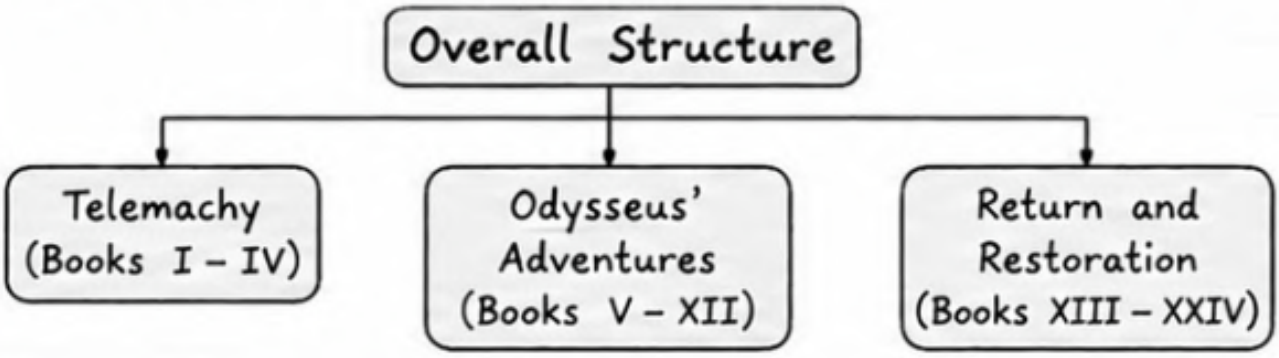
STRUCTURE AND NARRATIVE FRAMEWORK OF THE EPIC

- The Odyssey is a long narrative epic in 24 books (composed of separate yet connected episodes).
- It is divided into two major sections –
  - → Books I–IV : The Telemachy (the story of Telemachus).
  - → Books V–XXIV : The wanderings of Odysseus and his return to Ithaca.
- The poem does not follow a straight chronological order; it uses a flashback narrative.
- Odysseus recounts most of his past adventures (Books IX–XII) to the Phaeacians, which forms a long retrospective section.
- The narrative movement is from the present situation in Ithaca, to past adventures, and finally back to the homecoming and restoration of order.



INVOCATION AND COUNCIL OF THE GODS

1. Invocation

- The epic opens with an invocation to the Muse, the goddess of poetry.
- The poet asks the Muse to inspire him to tell the story of Odysseus, "the man of many ways."
- This invocation establishes the epic tone and links the poem to the tradition of divine literary inspiration.

2. Council of the Gods

- After the invocation, the scene shifts to Olympus, where the gods assemble in a council.
- Zeus presides over the council.
- Athene (goddess of wisdom) speaks for Odysseus and requests Zeus to allow his return to Ithaca.
- Zeus agrees and sends Hermes to the nymph Calypso, ordering her to release Odysseus from her island.
- This divine council sets the main action of the epic in motion – Odysseus' release, his journey home and the disposal of the suitors.

- The epic form blends human action with a larger world of gods and destiny.

HOMER'S NARRATIVE STYLE AND LITERARY TECHNIQUES

- The poem was shaped for oral recitation.
- Repeated formulaic phrases aid memory and performance.
- Fixed epithets, such as bright-eyed Athene, resourceful Odysseus and ever-watchful Zeus, are used throughout.
- Homeric or epic similes are extended comparisons that develop an image beyond a simple point of likeness.
- Similes make scenes vivid and reveal the poet's observation of ordinary life.
- Vivid descriptive passages and homely imagery bring people, places and actions to life.
- Direct speech gives characters distinct voices and reveals their thoughts and motives.
- Flashback narration in Books IX–XII lets Odysseus recount earlier adventures to the Phaeacians.
- Shifts in pace, suspense, pauses and repeated scenes create structural coherence.
- Homer often lets characters speak and act rather than constantly explaining events himself.

THE EPIC HERO, HOMERIC GODS AND THE PENELOPE SITUATION

EPIC HERO

- Odysseus is exceptional but human.
- Courageous, enduring, intelligent, resourceful, persuasive and skilled in strategy.
- His longing for Ithaca, Penelope and Telemachus sustains his journey.
- His pride and boastfulness after blinding Polyphemus bring Poseidon's anger and delay his return.

HOMERIC GODS

- The gods intervene in human affairs.
- Athene protects and guides Odysseus, while Poseidon opposes him.
- Divine power shapes events, yet humans remain responsible for their choices.
- The poem suggests an order or necessity beyond even the gods.

PENELOPE SITUATION

- The household (oikos) is the centre of social and moral liife.
- The suitors consume Odysseus' wealth and threaten succession and order.
- Penelope endures uncertainty and pressure to remarry.
- She represents fidelity, patience, intelligence and constancy, contrasted with Clytaemnestra.
- Her situation also reveals the limited position of women in the society portrayed.

CHARACTERS, THEMES AND IMPORTANT QUESTIONS

ODYSSEUS

- Resourceful hero, brave and enduring, a master of disguise and strategy, devoted to home, but also proud and sometimes reckless.

TELEMACHUS

- Begins as hesitant and powerless, grows through his journey to Pylos and Sparta, gains confidence and courage, and helps his father restore the household.

PENELOPE

- Faithful, patient, cautious and clever; delays the suitors through weaving and later tests the stranger through the secret of the marriage bed.

- Homecoming (nostos).
- Loyalty and marital fidelity.
- Hospitality (xenia).

INTRODUCTION TO ARISTOTLE'S POETICS

- Poetics is an early and influential work of literary criticism.
- It examines poetry as an art of imitation (mimesis).
- It discusses forms of poetry, especially tragedy and epic.
- It considers plot, character, thought, diction, song and spectacle.
- It explains how artistic representation differs from merely copying reality.
- It studies how tragedy produces pity and fear and brings catharsis.
- It remains foundational for literary criticism and aesthetics.

ARISTOTLE – LIFE AND EARLY BACKGROUND

- Aristotle was born at Stagira in Macedonia in the fourth century BCE.
- His father Nicomachus was a physician at the court of Amyntas III.
- He grew up in an intellectual environment.
- After his father's death, he joined Plato's Academy in Athens in 367 BCE.
- He remained there for about twenty years as Plato's student and colleague.
- His early writings were influenced by Plato and often used dialogue form.
- His early work Eudemus reflects Platonic ideas.

ARISTOTLE: THE PHILOSOPHER

- One of the most influential philosophers of ancient Greece.
- Possessed wide-ranging interests including physics, medicine, psychology, politics, poetry, drama, astronomy, logic, history, rhetoric, biology, ethics and mathematics.
- Made major contributions to theoretical, practical and productive knowledge.
- Studied animals and natural processes in works such as History of Animals, On the Parts of Animals and On the Generation of Animals.
- Contributed to logic, metaphysics, ethics and rhetoric.
- Wrote about four hundred works according to the source, of which thirty-one survived.
- His ideas deeply influenced Western thought through later intellectual movements.

ARISTOTLE AND ALEXANDER THE GREAT

- In 343 BCE Aristotle went to Pella, capital of Macedonia, to tutor Alexander, later known as Alexander the Great.
- King Philip II appointed Aristotle as his son's teacher.
- Surviving written records of their personal interactions are limited.
- Historians consider Alexander influenced by Aristotle's teaching.
- Alexander became king in 336 BCE.
- Aristotle then left for Athens, ending an association of about eight years.
- Aristotle's teachings are thought to have influenced Alexander's diplomacy and wise political leadership.

INTRODUCTION TO POETICS AND ITS IMPORTANCE

- Aristotle's Poetics is a seminal ancient work on art, literature and aesthetics.
- It is generally dated around 330 BCE.
- It examines the nature of poetry, different poetic forms and how artistic quality may be judged.
- It responds to Plato's criticism that poetry misrepresents reality and can mislead people.
- Aristotle argues that art is not merely a copy of the material world but expresses the artist's individual understanding.
- Poetry can affect and purge human emotions.
- The work became an important foundation for literary criticism and aesthetics, with influence extending into the Renaissance and later periods.

POETRY AS IMITATION – CONCEPT OF MIMESIS

- Mimesis means imitation or representation of life.
- Poetry represents life through actions, characters, emotions and experiences.
- Art is not a mechanical copy but a recreation of reality through the artist's own perspective and imagination.
- Aristotle includes epic, tragedy, comedy, dithyrambic poetry and music among imitative arts.
- Forms differ according to their medium, object and mode of imitation.
- Medium refers to the means used, such as language, rhythm, harmony, music or movement.
- Object refers chiefly to human actions and characters, represented as better or worse.
- Mode refers to narration or direct dramatic presentation.
- Poetry arises from the human instinct to imitate and the pleasure found in rhythm and harmony.

MEDIUM, OBJECT AND MODE OF IMITATION

- Aristotle distinguishes poetry and other imitative arts by three aspects: medium, object and mode.
- Medium means the means used to represent life. Poetry uses language; music uses rhythm and melody; dance uses rhythm and bodily movement.
- Object means what is represented. Imitative arts represent human actions and people.
- Tragedy presents people as better or more noble than ordinary life; comedy presents people as worse or ridiculous.
- Mode means how imitation is presented.
- A poet may narrate in his own voice, speak through an assumed character, or present characters acting directly before the audience.
- These three aspects help distinguish epic, tragedy, comedy, music and dance.

ORIGIN AND DEVELOPMENT OF POETRY

- Aristotle traces poetry to two natural human instincts: imitation and pleasure in rhythm and harmony.
- Human beings learn through imitation and enjoy representations of actions and life.
- Poetry developed from these natural tendencies into different forms.
- Poets who represented noble actions and admirable people contributed to the development of serious poetry and tragedy.
- Poets who represented lower or ridiculous behaviour in a satirical manner contributed to comic forms.
- Greek tragedy developed gradually through changes in dramatic plot, dialogue and verse.
- Aeschylus and Sophocles are among the important figures in the development of tragedy.
- Comedy represents people of lower or ridiculous character and was initially treated as a less important form.
- Epic poetry also represents noble actions, but it is generally narrative and covers a wider span of time.

DIFFERENCE BETWEEN TRAGEDY, EPIC AND COMEDY

TRAGEDY:

- Imitates serious and noble actions.
- Presents action directly through dramatic performance, not mainly through narration.
- Has a unified action with a beginning, middle and end.
- Uses elevated, rhythmic language and arouses pity and fear, producing catharsis.
- Usually concentrates on a limited period and can be staged.

EPIC:

- Also represents noble and heroic actions.
- Is mainly narrative and commonly uses a single kind of metre.
- Covers a wider period and may include several episodes and settings.
- Shares serious themes with tragedy but does not use stage spectacle and song in the same way.

COMEDY:

- Imitates people who are lower, ridiculous or flawed in character.
- Presents their faults in a satirical or amusing manner.
- Differs from tragedy in its subject and comic treatment of human behaviour.

KEY POINT — Tragedy and epic both treat noble action; their main difference lies in dramatic presentation, narrative form and scope.

DEFINITION AND CHARACTERISTICS OF TRAGEDY

- Aristotle defines tragedy as an imitation of a serious, complete action of a certain magnitude, expressed in embellished language, with different kinds of embellishment in separate parts, performed dramatically rather than narrated, and through incidents arousing pity and fear it accomplishes catharsis.

Characteristics of Tragedy:

- It deals with a serious subject and presents noble actions.
- It represents a complete action, having a beginning, middle and end.
- It has a suitable magnitude, neither too short nor excessively long.
- It is expressed in a heightened or rhythmic language.
- It is meant for dramatic presentation rather than mere narration.
- It arouses pity and fear in the audience and produces catharsis (purification of these emotions).
- It represents human action and moral choices, showing the consequences of those choices.

SIX ELEMENTS OF TRAGEDY

- Aristotle identifies six elements of tragedy, in the following order of importance:
  1. **Plot** – The arrangement and organization of incidents that make up the action of the tragedy. It is the central and most important element.
  2. **Character** – The moral qualities and dispositions of the persons in the drama, revealed through their actions and choices.
  3. **Thought** – The ideas, reasoning and general themes expressed in the characters' speeches, such as views on life, justice, duty or fate.
  4. **Diction** – The choice and arrangement of words, including style, expression and figures of speech.
  5. **Song** – The musical element of the tragedy, especially the choral parts, which add emotional depth and rhythm.
  6. **Spectacle** – The visual aspects of the stage presentation, such as setting, costume and other stage effects.
- Aristotle considers the plot as the most important element because tragedy imitates an action, not merely people.
- Character and thought, though next in importance, also play a vital role in shaping the action and its effect.

PLOT – MEANING, STRUCTURE AND IMPORTANCE

- The plot is the ordered arrangement of incidents or actions in a tragedy.
- It is the soul or central principle of tragedy, as it gives unity, direction and purpose to the whole work.
- A good plot is complete, unified and has a clear structure with a beginning, middle and end.
- The beginning does not depend on a prior event; the middle follows naturally from what comes before and leads to what follows; the end completes and resolves the action.
- Unity means that all the incidents are connected and contribute to one whole action. If an essential incident is removed, the whole effect is damaged.
- Magnitude refers to the appropriate length of the action. It should be large enough to allow a meaningful change in the situation, but not so long that the sequence becomes difficult to grasp.
- A determinate structure and a sense of universality make the action coherent, probable and believable.
- Aristotle advises against episodic plots, where events are only loosely connected and do not form a single, continuous action.
- The plot creates the emotional effect of the tragedy and guides the audience towards the feelings of pity and fear, which lead to catharsis.

UNITY, COMPLETENESS AND MAGNITUDE OF PLOT

- Plot is the arrangement of incidents or actions in a work and is the most important element of tragedy.
- A well-constructed plot has unity, completeness and a proper magnitude.
- **Unity**: The plot should present one complete action, not merely a series of events about one person. Every incident must contribute to the whole.
- **Completeness**: The action should have a beginning, middle and end.
  - The beginning does not itself need a prior cause.
  - The middle follows from what came before and leads to what follows.
  - The end follows necessarily or probably from the middle and brings the action to a completion.
- **Magnitude**: The plot should be of an appropriate scale or length - sufficiently extended to allow a change of fortune and proper development of events, but not so long that the whole cannot be easily grasped.
- **Determinate Structure**: Each part is necessary; if an important incident is removed, the whole is disturbed. Loosely connected, episodic plots should be avoided.
- **Universality**: The actions should express what a certain kind of person would probably or necessarily do in similar circumstances.

SIMPLE AND COMPLEX PLOT; REVERSAL AND RECOGNITION

- Simple Plot: A continuous and unified action without reversal or recognition.
- Complex Plot: A plot that includes reversal (peripeteia) and/or recognition (anagnorisis), often occurring together.
- Reversal (Peripeteia): A change of action into its opposite, brought about according to probability or necessity.
- Recognition (Anagnorisis): A change from ignorance to knowledge, often accompanied by a change in the relationships of the characters or in their fortune.
- Suffering (Pathos): A painful or destructive action (e.g., death, injury or deep misfortune).
- Astonishment and surprise can intensify pity and fear when they arise naturally from the plot.
- Oedipus is a well-known example where reversal and recognition occur together: he moves from high honour to ruin and at the same time recognizes his true identity.
- A tragic plot generally has two main parts:
  - Complication: The series of events that leads up to the turning point (reversal or recognition).
  - Resolution (Denouement): The events that follow the turning point and bring the action to an end.

CHARACTER, THOUGHT, DICTION, SONG AND SPECTACLE

- Aristotle identifies six parts of tragedy: plot, character, thought, diction, song and spectacle.
- Plot is the arrangement of incidents and is the primary and most important part.
- Character reveals the moral qualities of the agents and their choices. A tragic character should be:
  - Appropriate (suitable to the role and the action)
  - Lifelike (natural and believable)
  - Consistent (steady and coherent in conduct)
- Thought (or reasoning) concerns the ideas, arguments and what a character proves or expresses.
- Diction is the expression of thought through words and language, including qualities like clarity, fitness and the use of metaphor.
- Song is the musical element of tragedy, mainly seen in the choral parts, which adds emotion and aesthetic pleasure.
- Spectacle is the visual presentation on stage, including the setting and staging of events. It has an emotional effect but is the least connected with the art of poetry.
- Four qualities of character: goodness (virtue), propriety, lifelikeness and consistency.

CATHARSIS, TRAGIC HERO, EPIC AND TRAGEDY

- **Catharsis:** Tragedy arouses the emotions of pity and fear and brings about the purgation (or clarification) of these emotions.
- **Tragic Hero:** The hero is neither perfectly virtuous nor wholly wicked. He is a person of generally good standing who falls into misfortune through hamartia (an error or frailty), not through pure villainy.
- The best tragic plot is complex and effectively evokes pity and fear. Oedipus is a well-known example.
- **Epic and Tragedy:**
  - Both imitate serious and noble actions.
  - Tragedy: dramatic in form, concentrated around one unified action, shorter in length, and uses both song and spectacle.
  - Epic: narrative in form, longer, covers a wider span of action, and uses a single kind of metre.
- Aristotle gives tragedy the higher position because its concentrated and unified action can produce a stronger and more immediate effect.

CRITICAL EVALUATION:

- Poetics gives a systematic and lasting analysis of the principles of plot, character and dramatic effect. Its concepts, such as catharsis, reversal and recognition, remain highly influential, though modern literature also includes forms that go beyond its framework.

IMPORTANT QUESTIONS:

1. Define catharsis and explain its significance in tragedy.
2. Explain the unity, completeness and magnitude of plot.
3. Distinguish between a simple and a complex plot with examples.
4. Discuss the six parts of tragedy as given by Aristotle.
5. Compare epic and tragedy, highlighting their major differences.

- In this chapter, we will study the life and works of Sophocles, the background of the Antigone legend, its plot, characters and major themes.

SOPHOCLES – LIFE AND LITERARY CONTRIBUTION

Life:

- Sophocles was born at Colonus near Athens in 496 or 497 BCE.
- He belonged to a wealthy and respected family and received a good education.
- He took an active part in the cultural and public life of Athens.
- He lived through the most glorious period of Athenian history and died in 406 BCE at about the age of ninety.

- Introduced greater dramatic unity, strong characterisation and psychological depth.
- Explored themes such as fate, human dignity, moral responsibility and the conflict between individual and state.

BACKGROUND AND ORIGIN OF THE LEGEND OF ANTIGONE

- The story of Antigone is part of the Theban legend, which centres on the house of Oedipus.
- Oedipus, the king of Thebes, unknowingly kills his father Laius and marries his mother Jocasta.
- When the truth is revealed, Jocasta dies and Oedipus blinds himself and goes into exile.
- His sons Eteocles and Polyneices later quarrel for the throne and kill each other in battle.
- Creon, their uncle, becomes the new ruler and orders that Eteocles be given a proper burial, but forbids the burial of Polyneices as a traitor.
- Antigone, the sister of the dead brothers, decides to defy this order and bury Polyneices, believing it to be her sacred family duty.
- This legend provides the background for the tragedy Antigone, a powerful drama on the conflict between family loyalty, divine law and the authority of the state.

THE HOUSE OF OEDIPUS AND THE THEBAN FAMILY

- Laius and Jocasta were king and queen of Thebes.
- Their son Oedipus was exposed as an infant after a prophecy that he would kill his father and marry his mother.
- Oedipus unknowingly killed Laius on the road and later married Jocasta, not knowing her true identity.
- When the truth was revealed, Jocasta died by suicide and Oedipus blinded himself and gave up the throne.
- Their children were Eteocles, Polyneices, Antigone and Ismene.
- Oedipus was exiled from Thebes; Antigone accompanied him in his exile, while Ismene remained in Thebes.
- Eteocles and Polyneices later fought for the throne of Thebes and killed each other in the conflict.
- Creon, their uncle, became the new king of Thebes.
- Creon honoured Eteocles with full funeral rites but forbade the burial of Polyneices, declaring him an enemy of Thebes.

MAIN CHARACTERS AND THEIR INTRODUCTION

- **Antigone** - Daughter of Oedipus, courageous and principled, deeply loyal to her family and to the divine law.
- **Ismene** - Antigone's sister, more cautious and practical, who fears Creon's decree and the punishment it brings.
- **Creon** - King of Thebes and Antigone's uncle, who insists on the authority of the state and the need to uphold his law.
- **Haemon** - Creon's son and Antigone's betrothed, who loves Antigone and argues for justice and flexibility in the king's decision.
- **Teiresias** - A blind prophet who warns Creon of the divine anger and the disastrous consequences of his stubbornness.
- **Eurydice** - Creon's wife and Haemon's mother, a sensitive figure who appears near the end of the play.
- **Sentry** - A guard who first reports the burial of Polyneices and later brings Antigone before Creon.
- **Chorus** - The elders of Thebes, who comment on the action, reflect on justice, pride and the will of the gods.
- **Messenger** - A messenger who reports the tragic deaths of Haemon and Eurydice at the end of the play.

- Creon orders Antigone to be shut alive in a cave.

TEIRESIAS AND THE PROPHECY

- Teiresias is a blind prophet who understands divine signs and the will of the gods.
- He reports that the birds are fighting and crying, the sacrificial fire fails and the offerings are rejected by the gods.
- He explains that pollution has spread in the city because Polyneices remains unburied and Antigone is entombed alive.
- Teiresias warns Creon that he has offended the gods and must bury the dead and release the living.
- Creon, in anger, accuses him of accepting bribes and being influenced by others.
- Teiresias then predicts that Creon will pay for exposing a corpse and burying a living person, and that a child in his family will die.
- The Chorus urges Creon to heed the prophet because his prophecies have never failed in the past.

ANTIGONE'S PUNISHMENT AND THE TRAGIC ENDING

- Greek tragedy presents serious human action and explores dignity, choice, suffering, fate and divine order.
