Q.2 In the following question, select the wrong figure from the given series.

- Ans ☒ A.
☒ B.
☒ C.
☒ D.

Question ID : 1034352646

Q.3 In the following question below are given some statements followed by some conclusions based on those statements. Taking the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusion logically follows the given statements.

Statements:

I. Some A are T.

II. All T are R.

Conclusions:

I. Some R are A.

II. Some T are R.

Ans ☒ A. Neither conclusion follows

☒ B. Only conclusion I follows

☒ C. Both conclusion I and II follows

☒ D. Only conclusion II follows

Question ID : 1034352638

Q.4 Eight boys P, Q, R, S, T, U, V and W sit around a circular table facing towards the centre (not necessarily in the same order). V sits third to the right of W. R sits third to the left of P. V is the neighbour of P. Three boys sit between S and T. U sits second to the right of Q. R sits to the immediate left of T. Which of the following statement is correct?

I. P sits second to the left of U.

II. T sits second to the right of W.

Ans ☒ A. Only II

☒ B. Neither I nor II

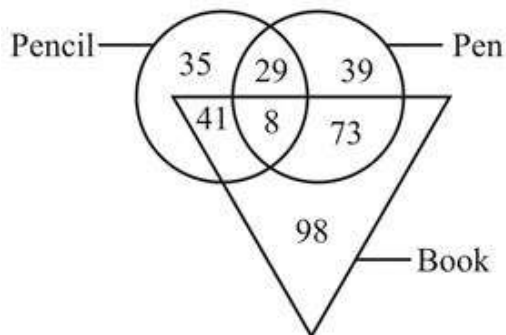

☒ C. Both I and II

☒ D. Only I

Read the following information carefully and answer the given questions.

Universities are being urged to seize the opportunity of expanding into India where reforms will radically change the country's higher education sector in the next decade.

In a new report, the British Council said India's tertiary-age population will be the world's third largest by 2020, behind only China and the United States. Ambitious plans by the government to expand university enrolment from 18% to 30%, means India needs to provide 14m extra university places by then.

The report comes after the latest figures on UK university admissions showed the number of Indian students heading to the UK halved in the last two years. The UK has registered its first drop in international students, of 1%, for courses starting in 2012-2013. Universities have blamed the fall on a restrictive immigration policy.

The British Council's researchers interviewed a range of Indian academics and higher education professionals for their report. Many said the UK should broaden its horizons when considering ways to partner with Indian higher education institutions, or risk losing out.

"Historically, we've been able to forge a deeper and more substantial relationships with many American universities," said Professor C. Raj Kumar, vice chancellor of O.P. Jindal Global University in India. "I've always felt that there is a case for this kind of engagement to be deepened with British universities." At the moment, India's higher education sector is highly regulated, with foreign universities restricted from setting up campuses. Until now, much of the research collaboration between the UK and India has been with "tier 1" universities and Institutes of National Importance, through programmes such as the UK-India Education and Research Initiative. But these top level institutions only represent 2.6% of the students who enrol in India. The vast majority come through either private, or state institutions, in particular through a system of "affiliated colleges" which are linked to state universities.

Quality control of these colleges has been a constant problem, although it has stepped up since the government made accreditation mandatory in 2013. The report recommends UK universities would do well to start partnering with these state institutions, which educate the bulk of Indian students.
