Comprehension:

Read the following information carefully and answer the given questions.

Imagine walking through a tropical forest as a sweet scent wafts through the air. A little farther down the path, the putrid stench of rotting flesh makes you catch your breath. Upon investigation, you find that both odours originate from flowers.

It's actually part of a strategy that helps flowering plants reproduce themselves and spread their species. Certain scents help these flowers solve a big problem.

Plants flower to produce seeds that can go on to become new plants. To make a viable seed, pollen from one part of the flower must fertilize the ovules in another part of the flower. Some plants can self-pollinate, using their own pollen to fertilize the ovule. Others require pollen from another plant of the same species – that's called cross-pollination.

Sometimes gravity helps pollen fall into place. Sometimes wind carries it. Wind-pollinated flowers, like those of many trees and grasses, don't produce a scent.

Other flowers are pollinated by birds, bats, insects or even small rodents carrying the pollen from one flower to another. In these cases, the flowers might provide a little incentive. Animal pollinators are rewarded by sweet energy- and nutrient-rich nectar or protein-packed pollen they can eat. Flowers that need the help of insects and bats go one step further, producing a floral scent that acts as a smelly kind of welcome sign for just the right pollinator.

An orchid blooming in the tropical forest or a rose in your garden needs to attract a pollinator to bring pollen from flowers of the same species. However, there are flowers that look similar but are from other species. To differentiate itself from other flowers, each species' flowers puts out a unique scent to attract specific pollinators. Similar to the perfumes at a department store counter, flower scents are made up of a large and diverse number of chemicals that evaporate easily and float through the air. The type of chemical, its amount and its interaction with other chemicals give the flower its unique scent. The scent of a rose may consist of as many as 400 different chemicals.

People can smell these floral scents because they easily evaporate from the flower, drifting on the air currents to attract pollinators.

जल के बिना जीवन संभव नहीं है। जल प्रकृति द्वारा मानव को दिया गया एक अनमोल तोहफा है, जिसका मूल्य लगाना बहुत कठिन है। जल के बिना जीवन का कोई महत्त्व नहीं, न ही कोई अस्तित्व है, फिर चाहे वो जीवन पशुओं का हो या मनुष्यों का। किन्तु आधुनिक युग में आदमी की लापरवाही ने धरती पर जल की कमी जैसी समस्या को उत्पन्न कर दिया है, जिसके भयंकर परिणामस्वरूप आज कई इलाके सूखाग्रस्त हैं एवं पीने योग्य पानी के लिए तरस रहे हैं। पृथ्वी का तीन-चौथाई भाग जल से घिरा हुआ है। इस तीन-चौथाई जल का 97 प्रतिशत जल नमकीन है जो मनुष्य द्वारा प्रयोग करने लायक नहीं है। सिर्फ 3 प्रतिशत जल उपयोग में लाने लायक है। यह विश्वव्यापी समस्या है इसलिए पूरे विश्व के लोगों को मिलजुल कर इसमें सहयोग करना होगा तभी इस अमूल्य सम्पदा को बचाया जा सकता है। जल संरक्षण का साधारण अर्थ है, किसी भी भांति जल को बचाना। जल के लगातार बर्बादी की वजह से जमीन में जल का स्तर गिरता जा रहा है। अब लोगों को कुएं में पानी नहीं मिलता है। जल संरक्षण का मुख्य उपाय है, बारिश के जल को स्टोर करना व पानी का दुरुपयोग रोकना। हमारे कुछ छोटे प्रयास जल संरक्षण में उपयोगी साबित हो सकते हैं। कृषि कार्यों में सिंचाई के लिए बून्द बून्द वाली सिंचाई करना उपयोगी है। बून्द बून्द सिंचाई से पानी की कम बर्बादी होती है। जल संरक्षण को सफल बनाने का सबसे कारगर उपाय सामाजिक जागरूकता है।

Read the following information carefully and answer the given questions.

Once again, Finland has ranked first in the UN's 2020 World Happiness Report, and, as always, it will have come as a surprise to some people. However, in spite of the not-so-favorable weather conditions, the country still tops the rankings. Finland may not be the biggest or the most powerful nation in the world, but it has plenty to offer that other countries don't.

Finland has long been praised by a multitude of international bodies for its extensive welfare benefits, low levels of corruption, well-functioning democracy, and its instilled sense of freedom and autonomy. Its progressive taxation and wealth distribution has allowed for a flourishing universal healthcare system, and, staggeringly, more than 80% of Finns trust their police force, which is far more than many other countries can claim.

Finland has long been punching above its weight within the global economy, too, giving the world global brands. The country is famous for being one of the first countries to push the flat working model, which exemplifies the Finnish approach to how businesses should be run, as well as how employees should be treated in the workplace. The flat working model is one in which there are few - or sometimes even zero - hierarchal levels between management and staff. Typically there is less supervision of employees and the structure aims to promote increased involvement with organizational decision-making, enabling open communication between all departments and teams within a business. As a result, this often leads to a significant increase in workplace productivity, team-cohesion, and has helped Finland pioneer agile working, whereby organizations empower its workforces to work, where when and how they choose, offering maximum flexibility and low constraints, something many European countries have only recently started to implement. Agile working has been championed in Finland for well over decade, and this has played a significant role in the wellbeing of Finnish citizens because overall happiness is inextricably linked with the perceived joy one gets from their job, and whether they can find a healthy work-life balance. Finland, like many other Nordic countries, excels in this area.

मानक भाषा, वह भाषा होती है, जिसका मानकीकरण किया गया हो। हिन्दी की अनेक बोलियाँ व उपबोलियाँ हैं, जिनमें खड़ी बोली को मानक हिन्दी नाम दिया गया है। इसी खड़ी बोली से हिन्दी में शिक्षा का प्रचार-प्रसार होता है। इस खड़ी बोली के अन्तर्गत अन्य क्षेत्रीय बोलियाँ समाविष्ट नहीं हैं। सम्पूर्ण देश में भाषा में एकरूपता व उसे अनुशासित रखने के लिए मानक भाषा की आवश्यकता पड़ती है। मानक का अर्थ होता है-परिनिष्ठित, आदर्श या श्रेष्ठ। भाषा के जिस रूप का व्यवहार शिक्षा, प्रशासनिक कार्यों, सामाजिक-सांस्कृतिक रूप से उसमें उपस्थित विविध विषयमताओं को दूर करके उसमें साम्यता लाकर एकरूप में किया जाता है, वही भाषा का मानक रूप होता है। किसी क्षेत्र की स्थानीय या आँचलिक बोली का शब्द-भण्डार सीमित होता है तथा उसका कोई नियमित व्याकरण भी नहीं होता, जिसके कारण इसे अधिकारिक या व्यावहारिक भाषा का माध्यम नहीं बनाया जा सकता। इसलिए ऐसी बोली विशिष्ट भौगोलिक, राजनीतिक, प्रशासनिक, सांस्कृतिक, सामाजिक आदि कारणों से अपना एक व्याकरणिक रूप विकसित कर लेती है, जोकि पत्राचार, शिक्षा, व्यापार, प्रशासन आदि में लिखित रूप में प्रयोग होने लगता है। इस प्रकार वह बोली एक मानक भाषा बन जाती है। भाषा प्रयोग की दृष्टि से यह बोली व्यापक हो जाती है और एक आदर्श, परिनिष्ठितता को प्राप्त कर लेती है। इसकी एक मानक शब्दावली का जन्म हो जाता है, जिससे यह मानक भाषा शुद्ध व परिमार्जित हो जाती है।

भाषा का मानकीकरण एक बहुत ही महत्वपूर्ण और अत्यावश्यक प्रक्रिया है। उदाहरण के लिए, क्षेत्रीय भाषा के स्तर पर 'चाबी' को अनेक नामों से पुकारा जाता है; जैसे-कुंजी, खोलनी, चाभी आदि, लेकिन यह आवश्यक नहीं कि पूरे हिन्दी प्रदेश में 'चाबी' को खोलनी या कुंजी कहा जाए और सभी को समझ आ जाए। इसलिए इस शब्द के यदि एक मानक रूप 'चाबी' को स्वीकृत किया जाए तो पूरा हिन्दी प्रदेश इसके प्रयोग को समझ जाएगा। इस प्रकार स्पष्ट है कि भाषा का मानकीकरण एक अनिवार्य प्रक्रिया होती है। एक आदर्श या मानक भाषा अपने आप में जीवन्त, स्वायत्त और ऐतिहासिक होती है।

मानक भाषा, वह भाषा होती है, जिसका मानकीकरण किया गया हो। हिन्दी की अनेक बोलियाँ व उपबोलियाँ हैं, जिनमें खड़ी बोली को मानक हिन्दी नाम दिया गया है। इसी खड़ी बोली से हिन्दी में शिक्षा का प्रचार-प्रसार होता है। इस खड़ी बोली के अन्तर्गत अन्य क्षेत्रीय बोलियाँ समाविष्ट नहीं हैं। सम्पूर्ण देश में भाषा में एकरूपता व उसे अनुशासित रखने के लिए मानक भाषा की आवश्यकता पड़ती है। मानक का अर्थ होता है-परिनिष्ठित, आदर्श या श्रेष्ठ। भाषा के जिस रूप का व्यवहार शिक्षा, प्रशासनिक कार्यों, सामाजिक-सांस्कृतिक रूप से उसमें उपस्थित विविध विषयमताओं को दूर करके उसमें साम्यता लाकर एकरूप में किया जाता है, वही भाषा का मानक रूप होता है। किसी क्षेत्र की स्थानीय या आँचलिक बोली का शब्द-भण्डार सीमित होता है तथा उसका कोई नियमित व्याकरण भी नहीं होता, जिसके कारण इसे अधिकारिक या व्यावहारिक भाषा का माध्यम नहीं बनाया जा सकता। इसलिए ऐसी बोली विशिष्ट भौगोलिक, राजनीतिक, प्रशासनिक, सांस्कृतिक, सामाजिक आदि कारणों से अपना एक व्याकरणिक रूप विकसित कर लेती है, जोकि पत्राचार, शिक्षा, व्यापार, प्रशासन आदि में लिखित रूप में प्रयोग होने लगता है। इस प्रकार वह बोली एक मानक भाषा बन जाती है। भाषा प्रयोग की दृष्टि से यह बोली व्यापक हो जाती है और एक आदर्श, परिनिष्ठितता को प्राप्त कर लेती है। इसकी एक मानक शब्दावली का जन्म हो जाता है, जिससे यह मानक भाषा शुद्ध व परिमार्जित हो जाती है।

भाषा का मानकीकरण एक बहुत ही महत्वपूर्ण और अत्यावश्यक प्रक्रिया है। उदाहरण के लिए, क्षेत्रीय भाषा के स्तर पर 'चाबी' को अनेक नामों से पुकारा जाता है; जैसे-कुंजी, खोलनी, चाभी आदि, लेकिन यह आवश्यक नहीं कि पूरे हिन्दी प्रदेश में 'चाबी' को खोलनी या कुंजी कहा जाए और सभी को समझ आ जाए। इसलिए इस शब्द के यदि एक मानक रूप 'चाबी' को स्वीकृत किया जाए तो पूरा हिन्दी प्रदेश इसके प्रयोग को समझ जाएगा। इस प्रकार स्पष्ट है कि भाषा का मानकीकरण एक अनिवार्य प्रक्रिया होती है। एक आदर्श या मानक भाषा अपने आप में जीवन्त, स्वायत्त और ऐतिहासिक होती है।
