Comprehension:

Read the following information carefully and answer the given questions.

Let the show begin! The snowdrops are fading, the daffodils are starting to tower above them, the crocuses are running riot, and the lengthening days are slowly warming the soil. These signs of spring mean one thing: it's time to start sowing.

You don't, however, have to do it all at once. Stagger sowing and you will be able to keep a steady stream of small seedlings from windowsill to cold frames to the outdoors. This means there's still plenty of time to plan. One way to do this is to arrange your seed packets in order of which need to be sown first, week by week. If something needs succession sowing, once the first sowing is done, it gets moved two weeks down the line.

It might also make sense, if you're working off one sunny windowsill, to buy in plug plants of things that are slow to get going. The likes of Simpson's Seeds and Plants, Rocket Gardens, Sea Spring Seeds and Organic Plants all offer a good selection, which they will send in the post. If you haven't started off chillies and aubergines yet then these are the way to catch up.

The rest – from annual flowers such as calendula and cornflower to beetroots, turnips, radishes, carrots, lettuce, brussels sprouts, cauliflowers, kales, peas – can be sown indoors. These benefit from a warm start, somewhere between 10-18C, but once they are up and pricked out they can be turfed outdoors to harden off; just bring them in at night for the first few days.

If the soil is warm enough – about 8-10 degrees – you can sow straight outside. If you don't have a soil thermometer, use your fingers: wiggle them into the soil up to your knuckles and see how long you can linger. You should be able to bear it for at least a minute; it needs to be cold, but not uncomfortable.

It also needs to be dry enough: this is best tested by crumbling a clump of soil on the surface. If it looks like bread crumbs then you're good to go. If the soil needs drying out, cover it with plastic, old window frames and cloches. While you're doing this, lay down some old cabbage, kale or rhubarb leaves on top of the soil, under the cover; or use a piece of thick, damp cardboard. Slugs love to congregate under there and you can swiftly pick off a generation before they do the same to your seedlings.

I always sow broad beans, dwarf peas and radishes first, if the temperature is right – about 10 degrees. The radishes will be up in a week, the other two the week after, and then it's game on for all the rest.

एक गद्यांश दिया गया है। गद्यांश के आधार पर पाँच प्रश्न दिए गए हैं। गद्यांश को ध्यानपूर्वक पढ़ें तथा प्रत्येक प्रश्न के चार विकल्पों में से सही विकल्प चुने।

सच्चाई, ईमानदारी, प्रेम, दयालुता, मैत्री आदि को नैतिक मूल्य कहा जाता है। सच्चाई को स्वतः साध्य मूल्य कहा जाता है यह अपने आप में ही मूल्यपूर्ण है। इसका प्रयोग साधन की भाँति नहीं किया जाता, बल्कि यह स्वतः साध्य है।

सभी विवादों में भी सत्य के अन्वेषण का प्रयास किया जाता है। सभी नैतिक मूल्यों का नैतिक आधार सत्य ही है। यद्यपि सत्य एक व्यापक दार्शनिक अवधारणा है लेकिन संक्षेप में इसे वस्तुस्थिति को ज्यों का त्यों कहना कहा जाता है। अर्थात् बिना किसी पूर्वाग्रह के किसी वस्तुस्थिति को देखना, समझना और व्यक्त करने को ही सच्चाई कहते हैं।

मनुष्य में दयालुता नामक सदगुण भी विद्यमान होता है। मनुष्य में अन्यो के प्रति दयालुता का भाव होता है। प्रायः वे अन्यो को कठिनाई में देखते हुए उनकी सहायता का प्रयास करते हैं क्योंकि मनुष्य यह स्वीकार करता है कि इस प्रकार की समस्याएं व घटनाएं किसी के साथ भी हो सकती हैं इसलिए मनुष्य दयालुता के बोध के कारण ही एक दूसरे की सहायता का प्रयास करते हैं।

प्रेम को सर्वोपरि मानव कहा गया है। मनुष्य प्रायः एक दूसरे से प्रेम करते हैं। प्रेम न केवल मानव जाति में विद्यमान होता है बल्कि मनुष्य में अन्य जीवों के प्रति भी प्रेमभाव विद्यमान होता है। क्रिश्चियन धर्म प्रेम पर अत्यधिक जोर देता है।

उसका तर्क है कि सभी मनुष्य एक ही ईश्वर की संतान हैं, इसलिए उनमें परस्पर प्रेम होना चाहिए। वास्तव में मानव प्रेम ही ईश्वर की सच्ची प्रार्थना है। क्रिश्चियन धर्म, प्रेम और मानव सेवा पर सर्वाधिक जोर देता है।
