Comprehension:

Read the following information carefully and answer the given questions.

Albert Einstein, German-born physicist who developed the special and general theories of relativity and won the Nobel Prize for Physics in 1921 for his explanation of the photoelectric effect. Einstein is generally considered the most influential physicist of the 20th century.

Einstein's parents were secular, middle-class Jews. His father, Hermann Einstein, was originally a featherbed salesman and later ran an electrochemical factory with moderate success. His mother, the former Pauline Koch, ran the family household. He had one sister, Maria, born two years after Albert.

Einstein would write that two "wonders" deeply affected his early years. The first was his encounter with a compass at age of five. He was mystified that invisible forces could deflect the needle. This would lead to a lifelong fascination with invisible forces. The second wonder came at age 12 when he discovered a book of geometry, which he devoured, calling it his "sacred little geometry book."

Einstein became deeply religious at age 12, even composing several songs in praise of God and chanting religious songs on the way to school. This began to change, however, after he read science books that contradicted his religious beliefs. This challenge to established authority left a deep and lasting impression. At the Luitpold Gymnasium, Einstein often felt out of place and victimized by a Prussian-style educational system that seemed to stifle originality and creativity. One teacher even told him that he would never amount to anything. Einstein's education was disrupted by his father's repeated failures at business. In 1894, after his company failed to get an important contract to electrify the city of Munich, Hermann Einstein moved to Milan to work with a relative. Einstein was left at a boarding house in Munich and expected to finish his education. Alone, miserable, and repelled by the looming prospect of military duty when he turned 16, Einstein ran away six months later and landed on the doorstep of his surprised parents. His parents realized the enormous problems that he faced as a school dropout and draft dodger with no employable skills. His prospects did not look promising.

Fortunately, Einstein later got admission to Eidgenössische Polytechnische Schule in Zurich. Einstein would recall that his years in Zürich were some of the happiest years of his life.

Comprehension:

Read the following information carefully and answer the given questions.

Albert Einstein, German-born physicist who developed the special and general theories of relativity and won the Nobel Prize for Physics in 1921 for his explanation of the photoelectric effect. Einstein is generally considered the most influential physicist of the 20th century. Einstein's parents were secular, middle-class Jews. His father, Hermann Einstein, was originally a featherbed salesman and later ran an electrochemical factory with moderate success. His mother, the former Pauline Koch, ran the family household. He had one sister, Maria, born two years after Albert.

Einstein would write that two "wonders" deeply affected his early years. The first was his encounter with a compass at age of five. He was mystified that invisible forces could deflect the needle. This would lead to a lifelong fascination with invisible forces. The second wonder came at age 12 when he discovered a book of geometry, which he devoured, calling it his "sacred little geometry book."

Einstein became deeply religious at age 12, even composing several songs in praise of God and chanting religious songs on the way to school. This began to change, however, after he read science books that contradicted his religious beliefs. This challenge to established authority left a deep and lasting impression. समाज के लिए समानता का अधिकार बहुत महत्वपूर्ण है। इस अधिकार का उद्देश्य कानून का शासन स्थापित करना है जहाँ पर कानून के समक्ष सभी नागरिकों के साथ समानता का व्यवहार किया जाता है। भारत में सभी लोगों को कानून का समान संरक्षण तथा कानून के समक्ष समानता उपलब्ध कराने के लिए पाँच प्रावधान (अनुच्छेद 14-18) किये गये हैं। यह धर्म, नस्ल, जाति, लिंग या जन्म स्थान के आधार पर किसी भेदभाव पर रोक लगाता है। संविधान यह सुनिश्चित करता है कि सभी नागरिक कानून के समक्ष समान होंगे। इसका तात्पर्य यह है कि देश के कानूनों द्वारा सभी को समान संरक्षण मिलेगा। कोई भी कानून से ऊपर नहीं है। इसका अर्थ है कि यदि दो व्यक्ति एक प्रकार का अपराध करते हैं तो उन्हें बिना किसी भेदभाव के समान दण्ड मिलेगा। राज्य धर्म, नस्ल, जाति, लिंग या जन्म स्थान के आधार पर किसी के साथ भेदभाव नहीं करेगा। यह सामाजिक समानता के लिए आवश्यक है। भारत के प्रत्येक नागरिक की दुकान, जलपान गृह, मनोरंजन के सार्वजनिक स्थानों तक समान पहुँच होगी तथा वह कुओं, तालाबों अथवा सड़कों का प्रयोग बिना किसी भेदभाव के कर सकता है। हालाँकि राज्य द्वारा महिलाओं और बच्चों के लिए विशेष प्रावधान व छूट की व्यवस्था की जा सकती है। सार्वजनिक रोजगार के मामलों में राज्य के द्वारा किसी के साथ कोई भेदभाव नहीं किया जायेगा। सभी नागरिक आवेदन कर सकते हैं तथा राज्य के कर्मचारी बन सकते हैं। वरीयता तथा योग्यता के आधार पर रोजगार उपलब्ध होंगे।
