Food and Agricultural Organisation (FAO) plays a catalytic role in India in five thematic areas: technical assistance and capacity building; piloting innovative and approaches in critical areas; multilateral collaborations on trans-boundary problems; harnessing Indian expertise for other developing countries; and as a policy advocate and a neutral adviser and broker. Cross-cutting issues such as Gender and Climate Change are also addressed. Based on these strengths and appreciating the needs of India, cooperation and partnership between FAO and the Government of India is focused on a few major components: FAO supports India in accessing global public goods related to crucial areas such as trans-boundary crop, livestock and fish diseases and pests, fishery management, food safety and climate change. Moreover, FAO assists India, when necessary, to contribute to the development of these global public goods. Advocacy for food and nutrition security and the role of FAO as a neutral adviser on contentious issues also forms part of some components. FAO also supports other countries to access centres of excellence within India.

Comprehension:

Read the given passage and answer the questions that follow.

Food and Agricultural Organisation (FAO) plays a catalytic role in India in five thematic areas: technical assistance and capacity building; piloting innovative and approaches in critical areas; multilateral collaborations on trans-boundary problems; harnessing Indian expertise for other developing countries; and as a policy advocate and a neutral adviser and broker. Cross-cutting issues such as Gender and Climate Change are also addressed. Based on these strengths and appreciating the needs of India, cooperation and partnership between FAO and the Government of India is focused on a few major components: FAO supports India in accessing global public goods related to crucial areas such as trans-boundary crop, livestock and fish diseases and pests, fishery management, food safety and climate change. Moreover, FAO assists India, when necessary, to contribute to the development of these global public goods. Advocacy for food and nutrition security and the role of FAO as a neutral adviser on contentious issues also forms part of some components. FAO also supports other countries to access centres of excellence within India.
