Read the following passage and answer the questions given after it.

Govindappa Venkataswamy (1 October 1918 – 7 July 2006) was an Indian ophthalmologist who dedicated his life to eliminate needless blindness. He was the founder and former chairman of Aravind Eye Hospitals, the largest provider of eye care in the world. He is best known for developing a high quality, high volume, low-cost service delivery model that has restored sight to millions of people. Since inception, Aravind Eye Care System (a registered non-profit organisation) has seen over 55 million patients, and performed over 6.8 million surgeries. Over 50% of the organisation's patients pay either nothing or highly subsidised rates. Its scale and self-sustainability prompted a 1993 Harvard Business Case Study on the Aravind model.

Born on October 1st in 1918 in Tamil Nadu, India, Govindappa Venkataswamy was the eldest of five children in a farming family. He walked two kilometers to school each day and his early lessons were written in sand from the riverbed. There were no doctors in his village, and by the age of 10 he had lost three cousins due to some complications. The untimely deaths spurred his decision to become a doctor. As a young man, he followed the teachings of Mahatma Gandhi, Swami Vivekananda and Sri Aurobindo. In 1944.

Venkataswamy received his medical degree from Stanley Medical College in Madras, graduating second in his class. In 1951 he qualified with an MS in Ophthalmology at Government Ophthalmic Hospital, Madras. Immediately after receiving his medical degree, Venkataswamy served as a physician with the Indian Army for three years.

Venkataswamy was permanently crippled by rheumatoid arthritis at age 30. He trained as an ophthalmologist. In 1956, he was appointed as the head of the Department of Ophthalmology at the Government Madurai Medical College and eye surgeon at the Government Erskine Hospital in Madura. He personally performed over 1,00,000 eye surgeries. As a government servant he helped develop and pioneer the concept of eye camps and received a Padma Shri from the Government of India in 1973.

In 1992, Venkataswamy and partners of Aravind founded Aurolab, an internationally certified manufacturing facility that brought the price of the intraocular lens down to one-tenth of international prices, making it affordable for developing countries. Today, Aurolab manufactures ophthalmic pharmaceuticals, instruments and equipment, in addition to intraocular lenses, and exports to 160 countries worldwide. Venkataswamy pioneered mobile eye camps with the government, and later implemented this practice at Aravind. Teams of doctors and nurses from Aravind regularly visit rural villages where they conduct 'eye camps' that screen patients for vision impairments. Those requiring glasses receive them on site. Patients requiring surgery are brought back to an Aravind hospital, where they receive surgery, room and board, return transport and a follow up visit at no charge. Each year Aravind hosts over 2,500 camps, averaging 40 camps every week with 500 community partners.
