Read the given passage and answer the following questions.

- Scientists have discovered a trove of forty-four planets in solar systems beyond our own in one go, dwarfing the usual number of confirmations from extrasolar surveys.
- The findings will improve existing models of solar systems, and may help researchers investigate exoplanet atmospheres.
- Novel techniques developed to validate the find could accelerate the confirmation of more extrasolar planet candidates.
- Astronomers pooled data from NASA's Kepler and the ESA's Gaia space telescopes. They confirmed the existence of these 44 exoplanets and described various details about them.
- 5. A portion of the findings yield some surprising characteristics. "For example, four of the planets orbit their host stars in less than 24 hours," said John Livingston, a graduate student at the University of Tokyo in Japan. "In other words, a year on each of those planets is shorter than a day here on Earth," said Livingston, lead author of the study.
- These contribute to a small but growing list of "ultrashort-period" planets, suggesting that they could be more common than previously believed.
- 7. "Sixteen were in the same size class as Earth, one in particular turning out to be extremely small - about the size of Venus which was a nice affirmation, as it's close to the limit of what is possible to detect," said Livingston.
- Scientists hope to understand what kinds of planets might be out there, but can only draw valid conclusions if there are enough planets for robust statistical analysis.
- The addition of a large number of new planets, therefore, leads directly to a better theoretical understanding of solar system formation, researchers said.
- 10. The planets also provide good targets for detailed individual studies to yield measurements of planetary composition, interior structure and atmospheres - in particular, the 18 planets in several multi-planet systems.
- 11. "The investigation of other solar systems can help us understand how planets and even our own solar system formed. The study of other worlds has much to teach us about our own," said Livingston.

नीचे दिये गए गद्यांश को पढ़कर पूछे गये प्रश्नों के उत्तर दीजिए। जैनेंद्र, अज्ञेय और इलाचंद्र जोशी, कहानी की उस धारा का प्रतिनिधित्व करते हैं जो सामाजिक यथार्थ का चित्रण करने वाली धारा के समानांतर बह रही थी। इन पर फ्रायड के चेतन-अचेतन सिद्धांत का प्रभाव दिखाई पड़ता है। इन कहानीकारों के यहाँ सामाजिक विषमता के प्रति आक्रोश का अभाव नहीं है। जैनेंद्र की कहानी एक रात असामान्य काम भावना की कहानी है। जैनेंद्र का पहला कहानी संग्रह फाँसी 1929 ई. में प्रकाशित हुआ है। जैनेंद्र किसी स्थिति को सहज तौर पर नहीं प्रस्तुत करते। उसमें दार्शनिकता का पुट अवश्य होता है। अज्ञेय ने आतंकवादी पात्रों के अतिरिक्त विदेशी वातावरण की कहानियाँ भी लिखी हैं। उनकी प्रारंभिक कहानियों का संग्रह विपथगा 1937 ई. में निकला था। वे वातावरण और पात्रों की मनःस्थिति को परस्पर घुला देने में सिद्धहस्त हैं। इलाचंद्र जोशी की प्रारंभिक कहानियों में सामाजिक यथार्थ को प्रकट करने का आग्रह मिलता है, किंत् सन् 35-36 तक उन पर फ्रायड के मनोविश्लेषण का गहरा असर पड़ गया। उनके कुछ कहानी-संग्रह इस प्रकार हैं- धूपरेखा (1935 ई.), दीवाली और होली (1942 ई.), आह्ति (1954 ई.)। जोशी में सामाजिक विषमता के प्रति आक्रोश के अलावा समझ न आ पाने वाली स्थितियों के प्रति रहस्य-भावना भी मिलती है।
